Subject: RE: OFFICIAL: pandemic flu guidance

Importance: High

Dear All,

I have just received the attached from HPS. To note this morning's version did not have references, did still have the odd table mislabelled as pandemic flu, and was awaiting Professor Zambon's comments on virology and blood risks.

I realise you want it right now so I am sending it.

But to note:

NERVTAG will see it tomorrow but mainly for info as they have seen it nans signed off in pan flu livery once already.

1. It also has track changes in it from the MZ iteration.
2. I have not read it through and sense checked it yet
3. It may not be fully camera ready for deployment tonight.
4. It will not be quite the same as the 'old' version HPS had deployed
5. Susan and/or Keith please do call me if problems.

Regards

JVT
